

Monisha Singh

Software Developer | Full-stack Developer | Open to Internship

monisha.singh06@gmail.com | +91 81308 81418 | [github](#) | [portfolio](#) | [linkedIn](#)

SUMMARY

Engineering student building production-ready web applications with React, Next.js, Node.js, and PostgreSQL. Hands-on experience in REST API development, deployment, and full-stack architecture, backed by multiple hackathon finals appearances.

SKILLS

- Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS
- Frameworks: React, Next.js, Node.js, Express.js, React Native, Tailwind CSS
- Databases: PostgreSQL, MongoDB, Supabase
- Tools: Git, GitHub, Vercel, Postman, VS Code
- Familiar: JWT Auth, REST APIs, CI/CD basics, Solidity, NumPy, Pandas

PROJECTS

AI Spend Audit | Next.js | TypeScript | Supabase [Github](#) | [Link](#)

- Built an AI-powered expense auditing platform using Next.js, TypeScript, and Supabase with a full-stack architecture including backend data capture, user authentication UI, and structured audit workflows
- Integrated Supabase for real-time data storage and form submission handling, implementing a lead capture pipeline with structured schema design
- Deployed on Vercel with responsive UI, backend integration and AI analysis layer currently in development

Resume Generator | React | Tailwind CSS | JavaScript | [Github](#) | [Link](#)

- Built a real-time resume builder using React and Tailwind CSS with live preview rendering (user input, update the preview DOM instantaneously via controlled component state)
- Implemented modular form architecture with 6+ reusable input components, reducing component duplication and enabling template switching without page reload
- Deployed on Vercel as a single-page app with optimized bundle size and mobile-responsive layout

Stock Market App | Next.js | TypeScript | TradingView Widgets | [Github](#) | [Link](#)

- Built a stock market dashboard using Next.js and TypeScript integrating TradingView's Charting Library for real-time candlestick charts, ticker tape, and market overview widgets
- Architected the project with a scalable folder structure — separate hooks, components, and page directories — designed for future REST API and authentication backend integration
- Deployed production frontend on Vercel; backend and auth layer planned as next development phase

StudyPal | React Native | Expo | [Github](#)

- Built a cross-platform mobile productivity app using React Native and Expo with features including task scheduling, study session tracking, and note organization across screens
- Designed a component-based UI architecture with reusable card and list components, tested across Android and iOS via Expo Go with consistent rendering

EXPERIENCE

Full Stack Web Development Trainee | InternsElite | July 2025 - Sept 2025

- Completed hands-on MERN stack training covering frontend, backend, database management, and REST APIs.
- Built minor and major full-stack web development projects using React, Node.js, Express.js, and MongoDB.
- Practiced Git/GitHub workflow, responsive UI development, and project deployment fundamentals.

EDUCATION

Maharaja Surajmal Institute of Technology

Bachelor of Technology, CSE

Cumulative GPA: 9.36/10

Janakpuri, New Delhi

2024-2028
